Weekly economic indicators for New York, California, and Texas

Source: Baumeister, Christiane, Danilo Leiva-Leon, and Eric Sims (2024), "Tracking Weekly State-Level Economic Conditions," *Review of Economics and Statistics*, 106(2), 483-504., Apollo Chief Economist. Note: The economic conditions indices are computed with mixed-frequency dynamic factor models with weekly, monthly, and quarterly variables that cover multiple dimensions of state economies. The indices are scaled to 4-quarter growth rates of U.S. real GDP and normalized such that a value of zero indicates national long-run growth.

2024 Q3 GDP estimate from Atlanta Fed: 3.3%

Weekly bullish consensus stock index

Source: Barron's, Haver Analytics, Apollo Chief Economist. Note: Market Vane Bullish = the degree of bullish sentiment for the S&P 500. For example: a Bullish Consensus of 65% for the S&P 500 implies that 65% of the traders are bullish and expect the S&P 500 to rise. Conversely, 35% of the traders are bearish and expect the index to decline.
